

# IBM i Managed Services

## Emerging Technology From imagination to Innovation

Maintec IBMi services provide organizations the flexibility, cost effectiveness and quality staff and processes they need to meet changing business needs by providing local or off-shore based resources. Our proactive monitoring process that prevent failure and provide self-healing capabilities to limit outages that impact Service delivery.

With the increasing industry competition and implementation costs, Application Management Services plays a pivotal role for long term IBM i systems success. It is important to take the necessary steps to optimize IBM i investments, deliver value, reduce Total Cost of Ownership (TCO) and improve end user satisfaction to get better business results.
